Technical device and application owners can create custom views and subscriptions for vulnerability reports, specific to the hardware and software they own and manage within their groups (network, infrastructure, Digital, etc.) from Tableau Enterprise. Owners are asked to generate report subscriptions at least quarterly, before and/or after the maintenance cycle has been completed.

- To begin, please visit General - ▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓▓ Vulnerability Views>Vulnerability Management Reporting and use the scroll bar at the top, to locate the Owner's Devices and Applications and Owner's EOL/Missing Patches dashboards.
- Filter the dashboard to display the specific details you'd like to see in your report.
- Once the desired dashboard has been located, select the "View: Original option from the upper sidebar. This will display the "Custom View" option. Name and save your custom view.

- Next, from the upper sidebar select "Watch>Subscription" to display the "Subscribe" function.

- You can choose to include the view currently displayed (your custom view) or a the entire workbook.
- Select the desire format for your report subscription (image, PDF or both).
- When selecting PDF, customize the paper size and the orientation from the dropdown.

- Enter the subject and message (optional).
- Then select the frequency in which you which to receive the report, from the dropdown options and select "Subscribe."
